DOCUMENT 1: FY26 GLOBAL TRADE DISCOUNT & SETTLEMENT POLICY (REF: ALK-FIN-089)

1. Base Volume Discount Matrix Volume discounts are applied to the *Gross Invoice Value* strictly based on the Dealer's Tier and the Quantity of Units Sold in a single transaction.

- **Platinum Dealers:**
  - 1 to 499 units: 5% discount
  - 500 to 999 units: 8.5% discount
  - 1000+ units: 12% discount
- **Gold Dealers:**
  - 1 to 499 units: 2% discount
  - 500 to 999 units: 5% discount
  - 1000+ units: 7.5% discount
- **Silver Dealers:**
  - 1 to 999 units: No discount (0%)
  - 1000+ units: 3% discount
- **Unregistered/Direct:** 0% discount regardless of volume.

2. Product Category Multipliers (Seasonal Adjustments) The base volume discount calculated above is subject to modification based on the Product Category and the Month the invoice was generated:

- **Electronics:** If billed in July or August, add an *additional* 2% to the final discount rate (e.g., an 8.5% becomes 10.5%). If billed in September, subtract 1% (penalty for end-of-quarter channel stuffing).
- **Spares:** Flat rate. No seasonal adjustments to the base volume discount.
- **Services:** Services NEVER receive a volume discount. If the category is "Services", the volume discount is strictly 0%, overriding the matrix in Section 1.

3. Early Settlement Discount (ESD) / Late Penalty This is calculated independently from the Volume/Product discount and is based on the gap between the Invoice_Date and the Payment_Receipt_Date.

- **Early Payment:** If the invoice is settled within **15 days or less**, the dealer receives a flat **$500 flat-fee rebate** deducted from the final net amount.
- **Late Penalty:** If the invoice takes **more than 45 days** to settle, a **2% penalty** is added to the total Gross Invoice Value.
- *Note on Unsettled Accounts:* If the Payment_Receipt_Date is blank or marked as "PENDING", assume no ESD and no Late Penalty for the purpose of this audit.
